Career Objective

Motivated BCA graduate, skilled as a Python Developer and Data Analyst, with expertise in data analysis, visualization, SQL, and software development. Seeking an opportunity to apply analytical, programming, and presentation skills to deliver impactful, data-driven solutions.

Education Qualification

- **Bachelor of Computer Applications (BCA)**   **[2026]**
  Presidency College, Bangalore. CGPA – 8.0

- **Class XII (CEBA)**   **[2023]**
  Seshadripuram PU College, Bangalore. Percentage – 82.33

- **Class X (State Board)**   **[2021]**
  Chandrakant Patil Public School, Kalaburagi. Percentage – 79.36

Certifications

• Data Analyst Certification – Mind Luster [2025]

• Power BI – Simplilearn [2026]

Projects

Insurance Analysis Dashboard (SQL + Power BI) – [Self Driven]   **[2024]**

- Analyzed customer demographics, policy performance, claim patterns, and revenue insights using SQL-based queries.

- Designed a clean, interactive Power BI dashboard featuring KPIs like claim rate, premium totals, customer segments, and policy distribution.

- Built DAX measures and visual reports to support decision-making on risk assessment, customer retention, and policy optimization.

Pizza Sales Analysis (SQL + Power BI) – [Self Driven]   **[2025]**

- Developed SQL queries to analyze sales performance, top-selling items, and monthly revenue patterns.

- Built Power BI dashboards with KPIs, time-series charts, and interactive slicers for better insights.

- Created DAX measures to calculate revenue, order counts, and category-wise comparisons.

Coffee Shop Ordering System (Python Project) – [Self Driven]   **[2024]**

- Built a menu-driven coffee ordering system using Python dictionaries and lists to manage items, prices, and customer selections.

- Implemented core functions for displaying the menu, adding items to the cart, validating user input, and generating the final bill.

- Automated checkout by calculating total cost dynamically and printing an itemized receipt for a smooth user experience.

Technical and Business skills

Programming: Python (Pandas, NumPy, Matplotlib), SQL, HTML, CSS, JS

Tools: Excel, Power BI, Tableau

Database: MySQL

Developer Skills: Problem Solving, Data Cleaning, ETL, APIs, Git/GitHub

Soft Skills : Team work , Leadership

Leadership Experience

Superstore Sales Analysis   **[2025]**

- Led a team in a complete sales analytics case study, guiding the end-to-end process including data collection, cleaning, preprocessing, visualization, and regression modelling using the Superstore Sales dataset (Kaggle).
- Coordinated team tasks and analysis, ensuring accurate insights on sales trends, profit drivers, discount impact, and regional performance — resulting in a structured analytical report with statistical models, visualizations, and key business conclusions
